Backend: Node.js, NestJS
Database: PostgreSQL
Tools & Others: Git, Docker, Figma, Sass, VS Code

Projects

Facebook Video Downloader
A web app that allows users to download videos and reels from Facebook conveniently with support for trimming and instant downloads.

Construction Company Website

A professional website for an architectural design business showcasing projects, services, and a contact form automated with WhatsApp and Google Sheets integration.

Personal Portfolio Website

A sleek, responsive developer portfolio to showcase my work, skills, and experience with a professional downloadable resume and a dynamic project section.

Experience

Walmart Advanced Software Engineering Job Simulation

Solved complex technical challenges including building custom data structures in Java, designing UML diagrams, and modeling database systems.

Citi Software Engineering Job Simulation

Used Java to visualize real-time stock risk, proposed machine learning systems for credit risk, and created UML diagrams for loan management systems.

EA Sports Software Engineering Simulation

Proposed and documented a new feature for EA Sports College Football, contributed C++ class definitions, and optimized performance through bug fixes.

Education

Self-Taught Software Engineer

 Gained practical knowledge through building real-world projects, completing virtual internships (Walmart, Citi, EA Sports), and independently mastering full-stack development using modern tools and frameworks.
